Course Description

The modules available in this tailor-made course are designed to cover non-technical skills have a direct impact on employee performance. Human error cannot be eliminated but efforts can minimise its effects and consequences. Participants equipped with appropriate non-technical skills can cope and prevail in adverse circumstances present in high-risk organisations.

Target Group

Personnel who operate in sharp-end industries where the consequences of malfunctions and/or errors result in damage to humans, equipment and the environment.

This course is applicable to safety-critical industries such as: Health Care, Oil & Gas, Petrochemical, Transportation, the Police and Military who require an understanding of the human reliability in their operation.
