Course Description

The objectives of the course are to raise awareness of the latest security threats and minimise the consequences of acts of unlawful interference. It reviews the theoretical and practical elements as listed in the operator's security training programme. The course content can be modulated to reflect the operator's security requirements and needs.

Target Group

- A security training programme for crew members.

Course Outline [Modular]

This course content includes the following elements:

- an outline of general aviation security, the latest threats and developments
- a recap of aviation security organisation and legal frameworks
- details on airport access control procedures
- details of airport security identification cards and their use
- a review of prohibited articles and aircraft search procedures
- an overview on passenger profiling and passenger restraint procedures (unruly pax)
- details on suspicious package handling procedures (bomb threats)
- details on protection & prevention with regards to unauthorised aircraft access (attempts on the flight deck)
- an overview of emergency response procedures

Course content complies with:

- Regulation (EU) No 965/2012 AMC1 ORO.GEN.110(a) requirements
- ICAO Security Manual Doc 9811 requirements
